Q: Crystal Reports.NET Remoting Type not found I want to use the Crystal Reports.NET Remoting functionality to do my reporting but for some reason my report deployment is failing. I've found a few related errors on stackoverflow but none of them are related to my problem. When I execute the report outside of.NET Remoting my report works perfectly. Here is a snipet of the error I'm getting. An unhandled exception of type 'System.TypeLoadException' occurred in CrystalDecisions.CrystalReports.Engine.dll Additional information: Could not load type 'MyServer.Engine.Common.CRNote' from assembly 'C:\WINDOWS\Microsoft.NET\Framework\v4.0.30319\Temporary ASP.NET Files\myapp.0f1ec7\2f8a5c02\970e52be.dll'. I've made sure to include the namespace on the assembly and the Crystal Reports (CrSehRpt.CrystalReports.Engine.CRReport). I've also tried it with and without the -noparameterbinding and -norecompile parameters in my remoting calls to the deployment page. I've made sure that my code is set up to use.NET 4.0 and ran it in a.NET 4.0 app and a.NET 4.0 web app. Here is the code I'm using to make the remoting calls.
