Q: Connecting to a db to create a SQLite database file I've been tinkering around trying to create a SQLite database file for an Android app. This is what I've been doing so far but am getting nowhere: public void onCreate(SQLiteDatabase db) { // TODO Auto-generated method stub db.execSQL("CREATE TABLE "+TABLE+"(columns)"); } But this is throwing an exception on the db.execSQL line saying: Cannot create table "TABLE" (Sqlite code 1) I think I'm missing something in the syntax or lack of understanding what this is suppose to do. I've been searching on here but haven't come across this exact issue. A: db.execSQL is used to create new database tables, but you need to execute some SQL statement. If you just want to create a table, you can do that using db.execSQL("CREATE TABLE "+TABLE+" ("+"column1 TEXT"+", column2 TEXT"+");"); A: SQLite won't be able to create tables with Cursor. Use db.execSQL("CREATE TABLE "+TABLE+"(columns)"); instead * m - 5 f o r t . 1 S o l v e - 5 * k - 8 = 4 * s , - 4 * k - 8 * s + 2 3 5 = 1 8 3 f o r k . - 4 S o l v e 0 = - 4 * k - z + 1 6 , 4 * k + 3 * z
