Well, these guys found a way to put fun into their model of the inside of the atom, and it turns out that it's not so much fun but it is pretty nifty, and it's cute too. Use the new Import, Draw, and Markup Actions to import and mark up new and existing drawings. Combine the new drawing import feature with the new annotation and attribution capabilities, and you can combine the two to mark up and import your drawings. Improvements to existing features
