## System Requirements:

Original DSiWare games require a 16GB Nintendo DSi system memory card. The system memory card must be formatted with FAT16 or FAT32 in order for original DSiWare games to load properly. The FAT format of your system memory card is indicated by the system message "FAT Format" when you insert your system memory card into the Nintendo DSi system. If this message does not appear, you need to reformat the FAT on the system memory card. The system also requires a compatible system (DSi/DSiXL/DSi2)
