The result is hugely improved responsiveness, greater player movement and transitions, an enhanced dribble mechanic, and goalkeepers you can be sure you can actually pick. This boost to the game's natural gameplay in the animations and in-game performance is in line with FIFA 18, FIFA 19, and other previous major FIFA titles. Using Motion Capture: Using Motion Capture for your player movements will make your players respond correctly to the real-life movement of your players. Players will run, sprint, change direction, change speed, backheel, and more naturally. Your player's movement can change during a match, depending on the game situation. The game's responsiveness will be improved, and you will feel more on the ball, making crucial decisions more naturally. Features: Player Evolution FIFA 19 marked a landmark moment in the evolution of soccer. The introduction of 'player evolution' moved the game into a new era of big, beautiful, and aesthetically-pleasing action. FIFA 22 comes with player evolution, which will allow each player to develop and evolve based on their role on the pitch, style of play, and performance. Player Personality In FIFA 21, your players were just part of a team. But in FIFA 22, they're individuals, with rich and varied traits, movements, voice-overs, and behaviors. Digital Passes With up to 3 simultaneous passes, FIFA 22 delivers a gameplay experience unlike any other sports title in the market, with assists coming from a variety of directions and passes being fed to your team at your discretion. Leaders at the Top Leaders are key to any team's success. In FIFA 22, your team's leaders use the Master Tactics System to give you the choice of whether your team's most important players will play to dominate or play to pass. Stunning Ball Movement FIFA 22 moves the ball faster, making it easier to intercept, strike, and dribble past opponents. The 50 new dribble animations will come from realistically modeled players and make the ball more fun to control, and they'll move faster than ever. In addition, animations and ball physics have been revised to provide more fluid, natural player behavior. A World of Authentic Player

FIFA (from Football Association FIFA) is the world's most popular sports video game franchise, and the #1 sports franchise of all time. It includes the widely popular and ever-changing FIFA series, the FIFA World Cup, and the long running association football franchise Pro Evolution Soccer (or PES). PES is not part of FIFA, but is a very popular soccer simulation game with the same gameplay and design as FIFA. PES players choose from one of four major nationalities (England, Italy, Germany and France) and play matches against AI-controlled teams, which are different for each one. The game has a simpler interface than FIFA and is much less demanding on the player's processor power. The result is a much more accessible and user friendly game, with a multiplayer option called EURO 2016 that takes place between June 10th and 10th July 2016. FIFA on Android! FIFA on Android is developed by a studio within Electronic Arts Inc. It's no secret that Android has been slowly but surely taking over the mobile gaming industry. Football game fans have already seen their favorite titles begin to hit the Android platform, from Champions League to Pro Evolution Soccer, and it is with great pleasure that we can now announce FIFA on Android! The game play is almost completely identical to the FIFA FIFA On Mobile, save for the fact that the size of the game on the Android is much smaller, making it easier to play on devices with a small display such as a Smartphone. Players will still be able to play online using the same account on the Android as they would on the mobile platform. Similar to the iOS version, FIFA is free to download, and support for the Android version will be available via the EA SPORTS Connect app. The wait is over! FIFA On Mobile is available for download now! FIFA On Mobile v.1.0 is our premiere mobile soccer title, which has been developed with the same passion and dedication that EA SPORTS and its sports gaming community share. What's New in v.1.0 New Features: [DEVELOPMENT CHANNEL] New iDEX platform is available. You can get involved in the development and play weekly updates of the game with the new 'Build' feature.
