The Magic Wand is a tool that enables you to select, segment, and delete parts of an image. The Spot Healing Brush is used to repair, correct, and remove damage to a single area. The Smudge tool is used to smear, blend, and paint, providing a freehand brush that can be used to recreate drawings or smudge an image. Use the Pen tool to draw paths, shapes, or lines. The Path Selection tool allows you to create, delete, and modify paths. You can use these paths to create vectors, add custom shapes, stroke, and emboss images. The Shape tool allows you to create, modify, fill, and stroke any shape, including freehand shapes and more complex shapes. The Gradient tool lets you modify colors and gradient as you colorize an image. The Gradient Scale tool is used to change the size of an image's gradient. The Lasso tool is a powerful selection tool. You can create a lasso shape to select areas of an image, or you can use one of several selection tools to select an area using its width, height, or corner locations. Paint brushes are one of the most popular tools used by artists to add texture or color to images. The Brushes panel organizes Photoshop's Painter's palette or toolset. You can add new brushes or delete existing brushes. You can also change the look and behavior of the selected brush. Once you are familiar with the different brushes in Photoshop, you can change the range of colors and the appearance of your colors by changing brush settings in the Brush Presets panel. The Spectrum Slider is a tool used to change the color of a specific brush. The Paint Bucket is a tool used to fill specific colors or colors based on a color palette. The Gradient Palette allows you to use a variety of colors and gradients to create your own unique paint strokes. The Styles panel is used to apply one of the pre-designed styles to an image. The Dodge and Burn tools are used to darken or lighten an image. The Dodge tool blurs one area of an image while the Burn tool creates sharp edges, as shown in the example below. The Levels tool is used to adjust the brightness and contrast of an image. It is useful for correcting imperfections in your images. The Eraser tool enables you to erase a specific area of an image. This feature is useful for correcting black areas in your images or for

Q: Newbie question: how to remove duplicates from two lists when a field is common to both? I have two lists of different length. One looks like this: Example and another looks like this: Example What I'm trying to do is remove those duplicates from the first one that have a common field in the second list. I'm assuming there is some short and easy way to do this with Python. Is there a simple way to do this? Thanks! A: You could use set to remove the duplicates. Example 1: x = [1, 2, 3] y = [1, 1, 2] x = set(x) y = set(y) print(x) print(y) Output: >>> set(['1', '2', '3']) >>> set(['1', '1', '2']) Using your Example: x = [1, 2, 3] y = [1, 1, 2] x = set(x) y = set(y) print(x) print(y) Output: >>> set(['1', '2', '3']) >>> set(['1', '1', '2']) The route would include an existing rail line that currently operates between the Brisbane CBD and the north of the state. It would allow a quicker travel time to get from northern parts of the state to the CBD via the Ipswich to Brisbane route. The cost of the Ipswich to Brisbane road and rail link will be around $2 billion. The consortium behind the new Ipswich to Brisbane route says the travel time to the CBD has been improving lately due to better infrastructure, but it is still too long for people who work in the northern parts of the state.Q: Is there a way to "pre-cached" or "soft-reset" an old Mac to the point of requiring no recovery mode instructions? I just bought a Mac and it was pre-bought by my company. I had a really bad virus, and I deleted it in OS X using the Disk Utility utility. I restarted the computer and instead of the normal prompt, it went to a nice blue recovery mode. It got a little further then it stopped. The
