vmware esxi 5.5 . Help! Trying to reset my password after having just installed OS X Mavericks, but I'm having trouble. It keeps asking me for my password and then freezes for a few seconds and then freezes again without anything happening. I've tried typing it manually by the little sign in menu but it still doesn't work. Any ideas on how to resolve this? A: Saving your password on a hard drive is an old way to secure data on OS X. I understand this may be confusing for some, so I have written a detailed guide to removing this feature. I don't know how your password gets into the save file, but the way to remove it is to follow the instructions in that guide. Maybe just delete the password file?
C. in a vacuum of less than 10⁻⁶ torr. Preferably, the compound includes a boron-containing group that may include nitrogen to form a nitrogen-containing boron compound. Preferably, the nitrogen-containing boron compound includes at least one of an amine, a thiol and a piperazine; and more preferably, a compound that may include the group $\text{N}(\text{R})_2\text{B}$, wherein B is a boron-containing group that may include a hydrogen group. Preferably, the compound is a boron-containing compound selected from the group consisting of: (A) a boron-containing compound having the following formula (I): $\text{B}(\text{R})_2\text{C}(\text{R}')_2$ wherein a, b, c and d are selected from the group consisting of a hydrogen atom and an organic group, and the dotted line represents an optional bond, (B) a boron-containing compound

having the following formula (II): $\text{xe}_2\text{x}_8\text{Ox}_8\text{S}_3$ wherein a, b, c, d and e are selected from the group consisting of a hydrogen atom and an organic group, and R is selected from a substituted or unsubstituted aryl
