Goto nokia pc suite connect to internet option.. Goto Configure. mobilydonglesoftwarefreedownload I have to use adb to connect to the phone as it's permanently locked and I can't manage to update the firmware. What I am doing is following the guide here, and I had Ubuntu 10.04 installed and had to do a upgrade and it wouldn't let me connect via adb. Did anyone have the same problem and figured it out? A: For anyone else who is stuck in the same situation, the solution is to upgrade adb from 1.0.29 to 1.0.32. This can be done by: Uninstall adb Replace all config files related to adb in /etc/ and ~/.android/ with the ones from the.zip file that was downloaded when the adb package was installed. If you don't have this you can download it here. Start adb and install/update the adb package. Start adb and install/update the adb package. Note that if you have 2 or more devices connected you need to disconnect them before step 5.
