
Crack De Arquitecto 3d Dx Home Edition 2021

Download

while reyes rios + larrain arquitectos still create their chukum from scratch for each project, their groundbreaking work paved the way for its mass production. now, the availability of the limestone cement and resin water has led to a resurgence in chukums use, in both new construction and historic preservation projects, throughout yucatan. chukum has empowered architects to create contemporary buildings that are deeply rooted in the history and culture of the region. the project is conceived as a single, cohesive volume, serving as a representation of the owner's personality, his dreams and desires. the shapes of the volumes, the relationship between them and their integration into the surrounding landscape all contribute to achieving this. the material, the design and the construction are all designed to make the interior more natural and habitable. the roof is an open air terrace, giving the home a spectacular view of the surrounding landscape. all these systems have the possibility of adjusting the energy used to heat the home, and to close the blinds. in addition, they use a lighting system that has been created for this project. it has a sensor that knows when there is enough light for reading and when is enough time to open the blinds and open the lights. as for the façade, they have done the same work on the side of the house that faces the street as well as the side that faces the courtyard. the façade on the street side has been done with a mixture of plaster and lime, and the one on the side of the courtyard has been built with a mixture of earth and cement. the mixture has been used in the same way as the one used in the ancient mayan homes, but with a different composition and cement that is lighter, stronger and lasts longer.
