mDNSResponder is a tool for Windows and Mac that allows a computer to perform network name resolution by responding to the broadcasts of other computers on a network. This can allow a computer to query and interact with other computers on a network without the need for a server. It can be used to determine the status and status changes of networked devices such as printers and scanners, and can be used to control applications using device drivers and network resources. It can also be used to detect and resolve naming conflicts on a network.

Operating System: Windows, Mac
Insightful is an event management tool. It helps businesses manage, plan and

run their events, whether they are big or small. Unlike other event management tools, it also enables businesses to track their events in real time, allowing them to make real-time marketing decisions to maximize ROI. Operating System: Windows, Linux

SMADGE is a server-based system for maintaining a shared calendar. It allows users to enter and save events and create user profiles. The tool also has built in tools for time tracking, for sending reminders, and to track employee productivity. Operating System: Windows, Linux

iRedMail is a flexible email filtering system. It allows you to quickly search and import all messages in an

individual or a group mailbox, filter messages and forward messages to other mailboxes. The project also includes an email administration tool and a webmail. Operating System: Windows, Linux, OS X

Tunesque is a tool that lets users discover and create their own playlists. Tunesque is a tool for music lovers who want to organize their playlists, their music libraries and their music collection. The tool also lets people create their own music playlists and discover new music. It helps users find music by artist, genre, playlist, mood, time of day, date and related music. Operating System: Windows, Linux, OS X

listening to music is a pleasurable activity and unlike most other forms of entertainment, you can listen to music whenever you like. instead of having to hop onto the train and commute to the cinema, why not listen to music while you're waiting for it to start. in recent years, we have seen a rise in the popularity of streaming music from the internet. people have been buying and selling music and music has been made available in many different media formats, so you have no excuse for not listening to your favorite songs when you want. even netflix have started to offer music as a service to their

streaming customers, which in itself, is a great sign that this is where it all is heading. how about a film night with friends? now, you can either watch the movie and listen to some music, or add some other type of film for instance, an episode of a show. a commercial cd player offers two listening options: cd and cassette, but no mp3 players have this feature. if you use a cd player, it may be advisable to buy an mp3 player for this. you can listen to music from a cd or cassette without the hassle of removing or re-inserting the disk. one of the first mp3 players, called i-pod was released in 2000 and the idea behind these was to make portable music devices. ever since, these ipod clones have

been released by various manufacturers and millions of people use them all over the world to listen to their favorite music and videos. the music industry has noticed this and now, the mp3 player has become one of the most popular devices in the world. music streaming is also very useful for audiophiles, because you can listen to your favorite tunes even if you're not in the same room. 5ec8ef588b
